

100,000+ Inhibitors & Agonists

Industry-Leading Bioinformatics

Target Coverage

1,500+ targets
20+ signaling pathways

Authoritative Support

In vivo / *in vitro* experimental
protocols from the literature

Dynamic Data

100,000+ solubility measurements
clinical and approval tracking

Wide Applications

Pharmacology and biological
research, covering 400+ disease
and field studies, including cancer,
neurology, inflammation,
metabolism, stem cells, etc.

80,000+ Bioactive Molecules

Recombinant Proteins

ADC&PROTAC Peptides

Inhibitory Antibodies

Oligonucleotides

Robust Multi-Level Quality Control

International Standards

Complete Platform

400+ precision instruments
300+ technical experts

Comprehensive Testing

NMR, HPLC, Elemental analysis, etc.

One-Stop Drug Screening Platform

Screening
Libraries

- Bioactive Screening Libraries
- Natural Product Screening Libraries
- Fragment Libraries
- Diversity Compound Libraries

Screening
Services

- Virtual / AI Screening
- SPR Assay Service
- DEL Screening

Lead Compound Optimization

Easy-to-use Lab Tools

Reference Standards Enzymes

Fluorescent Dyes Antibodies

High Efficiency Biological Kits

Isotope-labeled Compounds

Biochemical Assay Reagents

Induced Disease Models Products

Cited in 80,000+ Publications

MedChemExpress Global Partners
